fÄst

Electronic Live Act

Livetronica & Deep Grooves

With his deep, melodic house productions full of driving grooves, fÄst cultivates an atmosphere that merges dark undertones with shimmering textures.

ABOUT

fÄst *[fæst]* is the solo project of Darmstadt-based musician and producer Jeremy Fast, positioned at the intersection of Melodic House, Deep House, and Livetronica.
His live sets combine deep grooves, electronic beats, and live synthesizers, evoking artists like Ben Böhmer, Monolink, or Teho—yet with a distinctly emotional and unique sound.

The project was created during the 2020 lockdown in his home studio and celebrated its live debut in 2022 at Osthang in Darmstadt. Since then, he has been working continuously with regional and national singers and artists from the electronic music scene.

Equipped with synthesizers, samplers, and a passion for spontaneity, fÄst creates live sets that let the audience float between driving club grooves and emotional depth.
